Answer

- (a) (i) **False:** A claim that an enterprise is pursuing through legal process, where the outcome is uncertain, is a contingent asset.
- (ii) **False:** At the end of the accounting year, all the nominal accounts of the ledger book are totalled and transferred to Profit & Loss A/c.
- (iii) **True:** Where the due date is specifically given, then there is no need of further addition of 3 days grace to it.
- (iv) **False:** Amount spent for replacement of any worn-out part of a machine is revenue expense since it is part of its maintenance cost.
- (v) **False:** Debentures Suspense Account appears on asset side of Balance Sheet under Non-Current Asset.
- (vi) **False:** If the errors are detected after preparing trial balance, then all the errors are not rectified through suspense account. There may be Errors of Principle and/or Errors of Omission, which can be rectified without opening a suspense account.
- (b) Money Measurement concept: As per this concept, only those transactions, which can be measured in terms of money are recorded. Since money is the medium of exchange and the standard of economic value, this concept requires that those transactions alone that are capable of being measured in terms of money be only to be recorded in the books of accounts. Transactions and events that cannot be expressed in terms of money are not recorded in the business books.

Periodicity concept: According to this concept, accounts should be prepared after every period not at the end of the life of the entity. This is also called the concept of definite accounting period. Usually, this period is one accounting year. We generally follow from 1st April of a year to 31st March of the immediately following year.

(c) **Corrected Trial Balance of Mr. X as on 31st March, 2022**

Particulars	Dr. Amount ₹	Cr. Amount ₹
X's Capital		4,668
X's Drawings	1,692

Inventory (1.4.2021)	792	
Rent and rates	1,389

- In a business house a number of small payments, such as for taxi fare, cartage, etc., have to be made. If all these payments are recorded in the cash book, it will become unnecessarily heavy. Also, the main cashier will be overburdened with work.
 - Therefore, it is usual for firms to appoint a person as 'Petty Cashier' and to entrust the task of making small payments. of-course he will be reimbursed for the payments made.
 - Later, on an analysis, the respective account may be debited.
 - Imprest system of petty cash is followed, under this system a fixed sum of money is given to petty cashier for meeting expenses for a prescribed period.

Advantages of Petty cash book are:

- (i) Saving of time of the chief cashier
- (ii) Saving in labour in writing up the cash book and posting into the ledger
- (iii) Control over small payments
